

# PUMPING PISTONS

**QUALITY AND RELIABILITY IN ALL  
CONDITIONS**

**DALCOM srl** is a leader manufacturer in pumping pistons.

Our thirty year experience has allowed us to select the best compounds and to develop a high reliability production system. Internal testing ensure both **a perfect adherence** between the steel body and the compounds and **a high resistance to abrasion**.

Now the product range fulfils **all the brands for concrete pumps**, where it is possible to choose between rubber and polyurethane.

## **RUBBER PUMPING PISTONS:**

- The unique oil-and solvent-resistant rubber coating of our pistons ensure a longer work-life, even under conditions of heavy use.
- Perfect adherence between rubber and steel body.
- Its structural integrity and resistance to abrasion are guaranteed by **careful laboratory tests**.

Hardness test

## **POLYURETHANE PUMPING PISTONS:**

- The proven wear-resistant characteristic of polyurethane allows this piston to **last up to three times longer**.
- Polyurethane does not damage the chromed surface of pumping cylinder, **indeed ensures a through cleaning**.
- Perfect adherence between polyurethane and steel body.
- Its structural integrity and resistance to abrasion are guarantee by **careful laboratory tests**.

It is possible to combine the polyurethane piston with a Teflon grease that facilitates the sliding of the lips on chrome surface **reducing noise and wearing**.

**DALCOM**® s.r.l.
